

WHAT IS

Medical Payments Coverage?

In Idaho, medical payments coverage is an add-on to an auto insurance policy that covers expenses related to motor vehicle collisions. Also called MED PAY, it covers you and any passengers in your vehicle.

Use Your Benefits!

Open your claim immediately after a collision.

You shouldn't have to pay expensive medical bills out of your own pocket.

Use your benefits: you paid for them via premiums to your insurance company.

DO NOT PANIC!

Meet with one of our experienced attorneys and learn more about MED PAY coverage and your rights when you are injured.

1. Call your insurance company to report the incident.
2. Ask your insurance company to confirm you have MED PAY and the amount of coverage.
3. Get the claim number, along with the address and phone number for the claims office.
4. Call the claims office and speak to the adjuster assigned to your claim.
5. Provide your claim number, adjuster name, claim office address, and phone number to all of your healthcare providers.
6. Instruct all of your healthcare providers to bill your MED PAY directly, and to include copies of their chart notes and/or reports for each treatment you receive.
